AUTOMOTIVE ENGINEERING EXPOSITION 2017 YOKOHAMA

Fukuda is pleased to announce that the company will be attending the Automotive Engineering Exposition 2017 YOKOHAMA. Our booth will feature the following products, which are particularly tailored for the automotive industry, as well as other members of the Fukuda product range. We very much hope that you will be able to take the opportunity to visit us there.

Session Times: May, 24 (Wed) - 26 (Fri) 10:00~18:00 (Last day until 17:00)
 Venue: Pacifico Yokohama Exhibition Hall A
 Booth: 35

Products to be exhibited

EtherCAT Compatible Air Leak Tester

FLA-0100 series

- Reduces wiring/Delivers flexible line transition
- Line remote control/centralized management capable
- Multi-channel compatible
- High-speed data transfer
- Compact but highly functional/Fitted with a range of calibration functions

Air Leak Tester with Auto Calibrating Functionality

FLZ-0620 series

- Differential Pressure type Air Leak Tester
- Improved leak sensitivity precision through its auto-calibrating function
- Improved testing precision from a more stabilized zero point
- Separate Type (Greater unification of the test piece and sensor environments)

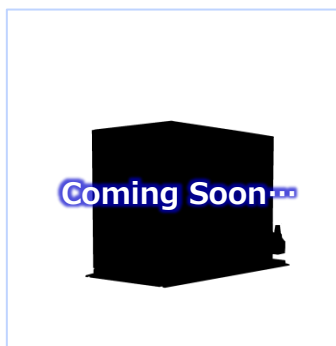

Helium Leak Test System

HES-2000 series

- Optimal in leak testing requiring high precision or high pressure
- Designed for detection of the most minute of leaks
- Targeted Testing:EV,HEV testing, Inverters, Converters, Motors, Harnesses, Connectors, Battery cases etc.

Fukuda display also features

Compact Air Leak Tester

FLZ-0220 series

- Easy operation using the touch panel
- Compact, high performance, with a range of correcting functions
- Further convenience for compound pressure specifications with both positive/negative pressure options available
- ▼ More advanced options
 - Simple sensitivity adjustments via the installation of a standard leak
 - Barcode reader connection
 - High-speed data communication (EtherNet/IP built-in)
